CHANGELOG

* *KNOWN BUGS*

- **IMPORTANT 1** *: "Features – Work Folders" and "Features – Windows Search" : Break Windows installation if you try to remove them in a 2ⁿᵈ reducing steps. So if you want to remove Windows Features, it will be better to remove them in a one way step !*

- *WinReducer 8.1 "Open – Tools – USB" : wrong characters appear under certain circumstances (especially in German language)*

- *"Features – Windows Search" : when trying to disable or remove it, it doesn't completly work. Tried with an original fresh installation without WinReducer customizations, and got same result. Maybe this is a Windows 8.1 bug and not a WinReducer bug*

- *"Accessories – Windows Mail" : Opening Word 2010 files seems to be broken*

- *"Accessories – ModernUI – Apps" : try to remove one of them will prevent display all other Apps. So you need to pin them manually from Apps screen to Start screen after Windows installation*

- *« Network – Skydrive » : All files are removed but you could always be able to use it in « Modern UI - Immersive Control Panel ». Skydrive is too deeply integrated into Windows 8.1. The only way, to hide it, is to remove the « Immersive Control Panel » but you will loose many Windows configuration possibilities*

- *"Services – Homegroup Listener and Provider Services" : break "Advanced Sharing" in "Network and Sharing Center" control panel*

- *"Services – Windows Update Service" : break "Net Framework 3.5" installation and Windows Store*

- *"Tweaks – Sound – Disable all Sounds" : seems to not work (Sound scheme is always windows default one)*

WinReducer 8.1 – v1.06 *(2014.04.21)*

* ***NEW***

    . « Modern UI Apps – OneNote »

    . « Presets - Protect MS Online Account »

    . « Presets - Protect Windows Media Center »

    . « Tweaks - Modern UI - Hide Power Button on Start Screen »

    . « Tweaks - Terminal - Always Launched with Administrator Rights »

* ***UPDATED***

    . English language file to v1.06

    . « Removing Window » : New « Removing Speed » profiles (Available Soon)

    . WinReducer 8.1 has been updated to support the New Removing Engine (Available Soon) to improve removing speed by 70%

    . « Network – SkyDrive » : Name Changed to « Network – OneDrive »

    . « Presets – Protect MS Office » : Add support for « Control Panel - Font Folder (Files) » and « Fonts – Meiryo »

* ***FIXED***

    . « Accessories - Briefcase » : Broke SkyDrive in Modern UI Apps

    . « Network – OneDrive » : Renaming Windows Folders was buggy

    . « Presets – Protect Important Files » : Didn't work properly

WinReducer 8.1 – v1.05 *(2014.04.09)*

* ***NEW***

    . "Presets - Protect Important Files" : Display protected files list (but not yet available for modifications)

    . Add support for Update 1 (April 2014)

* ***UPDATED***

. English language file to v1.05 : Some names in « Appearance – Backgrounds » tab have changed so take care at your wccf files

. « Drivers - Support – EFI and UEFI » : Cleanup Improvements

. « Services - Internet Connection Sharing (ICS) Service » : Cleanup Improvements

. « Services – WWAN AutoConfig Service » : Cleanup Improvements

. "Presets - Protect Important Files" : Include "Windows\Fonts\msgothic.ttc" in the list (To solve trouble with tray volume bar font)

. "Presets - Protect Important Files" : Include "Windows\System32\wmasf.dll" in the list (To solve trouble with multimedia software)

. « Presets – Protect MS Office » : Add « Control Panel - Font Folder (Files) » to avoid fonts errors messages during installation

. « Presets – Protect Modern UI Apps » : Add protection for « Services – App Readiness Service »

WinReducer 8.1 – v1.04 *(2014.03.09)*

* ***NEW***

. « Appearance - Backgrounds » : Add important information sizes and types for each pictures

. « Drivers - Network - ISDN – IBM »

. « Drivers - Network - ISDN – Microsoft »

. « Drivers – Support – PC Card »

. « Modern UI Apps – Lockscreen SlideShow »

* ***UPDATED***

. English language file to v1.04 : Some names in « Appearance – Backgrounds » tab have changed so take care at your wccf files

. « Modern UI Apps » (All) : Change the removing process which should be more efficient and with less workaround

. « Control Panels - Sync Center Folder (Files) » : Cleanup Improvements

. « Drivers – Network – Ethernet – SIS » : Cleanup Improvements

. « Drivers - Support - Firewire (IEEE1394) » : Cleanup Improvements

. « Drivers - Support – Modem » : Cleanup Improvements

. « Features – Windows Search » : Cleanup Improvements

. « Modern UI Apps – Media Viewer » : Cleanup Improvements

. « Services - Remote Desktop Services » : Cleanup Improvements

. « Services - Smart Card Services » : Cleanup Improvements

. « Services – WLAN AutoConfig Service » : Cleanup Improvements

. « Presets – Automatic Removing Process » : Update for « Features - Printing - Fax and Scan Services » and add support for « Features - XPS Viewer and Printer »

* ***FIXED***

. « Drivers – Printers – Fax » : Didn't work properly

. « Drivers – Printers – XPS » : Didn't work properly

. « Remove – Modern UI Apps - Lockscreen Camera » : Didn't work properly

. « System – User Folders – Contacts » : Deprecated folder cleanup didn't work properly

. « System – User Folders – Desktop » : Deprecated folder cleanup didn't work properly

. « System – User Folders – Documents » : Deprecated folder cleanup didn't work properly

. « ISO File Creator - Save in a WIM File » : Also create an uneeded ISO file in ISO Folder

WinReducer 8.1 – v1.03 *(2014.03.03)*

* ***FIXED***

. « System – User Folders » : Delete all default uneeded folders, in case you changed their paths

. « ISO Creator – Save in a WIM file » : if your install.wim file is smaller than the « Split WIM » size, then the file is deleted during process

. « ISO Creator – Save in a WIM file - UEFI Boot Compatibility » : Don't work in « HOME – TOOLS »

WinReducer 8.1 – v1.02 *(2014.03.02)*

* ***NEW***

. « Drivers – Printer – Fax »

. « Drivers – Printer – XPS »

. « Drivers – Serial Pen – Wacom »

. « Drivers - Support – Boot – PCAT »

. « Drivers - Support – Boot – PXE »

. « Drivers - Support - HD-Audio »

. « Network - Sharing (Shell Extensions) »

. « Tweaks – Context Menu - Include in Library (Hide) »

. « ISO File Creator - Save in an ISO File » : Add an option to bring support to ISO for UEFI boot creation

. « ISO File Creator - Save in a WIM File » : Add an option to bring support to WIM file for UEFI boot creation (without using an ISO)

. « ISO File Creator - Save in a WIM File » : Add an option to automatically copied all the content, of the ISO extracted folder, directly in a FAT32 prepared USB thumb drive using « Bootable USB Device Creator »

. « ISO File Creator - Save in a WIM File » : Activate « Bootable USB Device Creator » after WinReducer reducing process

* ***UPDATED***

. ***KNOWN BUGS*** : *Add « Network – Skydrive »*

. English language file to v1.02

. "START -> FOLDER" : Default opened folder changed to "ExtractedByWinReducer" folder

. "TOOLS - ISO - Save in an ISO File" : Default opened folder changed to "ExtractedByWinReducer" folder

. « Accessories – Tablet PC (Engine) » : Cleanup Improvements

. « Drivers - Support - EFI and UEFI » : Name Changed to « Drivers - Support - Boot - EFI and UEFI »

. « Fonts – Boot Fonts » : Cleanup Improvements

. « Optimizations - EXPERT – Windows Unneeded Cleanup Files » : Cleanup Improvements

. « Services – File History Service » : Cleanup Improvements

. « Tweaks – Modern UI - Enable Apps to Work with UAC Disable » : If you check it, then it automatically disables « Tweaks - System - Disable User Account Control (UAC) » to prevent trouble

. « Tweaks - Explorer - Enable Preview Pane » : Name Changed to « Tweaks - Explorer - Preview Pane (Show) »

. "Unattended - Hide Boot Image Selection" : Changed from « NAME » to « INDEX » in « autounattend.xml » file

. « ISO File Creator - Save in a WIM File » : Various Process improvements

. « ISO File Creator - Save in an ISO File » : Process to reduce size

. « ISO File Creator - Save in an ISO File » : Various Process optimizations improvements (especially to reduce size)

. Various WinReducer GUI Improvements

* ***FIXED***

. « START – ISO » and « START – FOLDER » : Didn't work properly in really rare case

. « Tweaks - Explorer - Open File Security <u>Waring</u> Removal » : Name changed to « Tweaks - Explorer - Open File Security <u>Warning</u> Removal » to improve support

. « Unattended - Hide Boot Image Selection » : Could hang Windows installation under certains circumstances

. « Other Users » bug during 1st login has been fixed

. English language and keyboard bug during 1st login has been fixed

WinReducer 8.1 – v1.01 *(2014.02.09)*

* ***NEW***

. « Keyboards - French (Switzerland) »

. « Network – Skydrive »

. « Tweaks – Explorer - Open File Security Warning Removal »

. « Unattended – Time Zone »

. « Unattended – Time Zone Disable Auto Daylight »

* ***UPDATED***

. English language file to v1.01

. « WinReducer81.xml » : Name changed to « WinReducer.xml » to ensure compatibility with future WinReducer Software. Automatically done if « WinReducer81.xml » is detected in the WinReducer folder

. « START – ISO » and « START – FOLDER » : Windows Editions detection improvements

. « EXIT » : Exit cleanup improvements

. « Features – Windows Search » : Cleanup improvements (Modern UI Search)

. « System - Updates » : If you downloaded all Updates, by yourself (so without WinReducer), you need to put all of them in the folder « WORK – INTEGRATE – UPDATES – x64 – Updates » (for x64) and « WORK – INTEGRATE – UPDATES – x86 – Updates » (for x86). All folders will be created automatically

. « System - OOBE Configuration » : Add import for registry file (*.reg)

. « System - OOBE Configuration » : New WinReducerPI folder location : « WORK – INTEGRATE – SOFTWARE ». This is the default working folder. So it will <u>not</u> be deleted after the process. You could update it as you wish, and don't forget to also update the script. The folder will only be copied if you activate the OOBE in WinReducer. It also replaces any existing WinReducerPI folder in your ISO. But in « Preset Editor », you could save the script if you save your settings in a new wccf preset file

. « System - OOBE Configuration » : Script has been renamed from « WinReducer81.cmd » to « WinReducerPI.cmd »

. « System - OOBE Configuration » : New script location in folder « WORK – INTEGRATE – SOFTWARE » to easily configure or update it according to your WinReducerPI folder

. « Tweaks - Internet Explorer - Do not Save Encrypt Pages to Disk » : Name changed to « Tweaks - Internet Explorer - Do not Save Encrypt<u>ed</u> Pages to Disk »

. ***FIXED***

. « Appearance - Activate Theme Support - Modern UI Background » : Help tips didn't work correctly

. « Unatttended – Administrator Account » : GUI improvements

. « Unattended – User Account » : GUI improvements

. « Unattended – User Account Group » : Didn't work properly when using a different language than English

WinReducer 8.1 – v1.00 (Final) *(2014.01.27)*

* ***NEW***

. « Tweaks - Explorer - Show Full Path in Explorer Title Bar »

* ***UPDATED***

. English language file to v1.00 (Final)

. HowTo file to v1.00 (Final)

* ***FIXED***

. « Unattended – Activate Auto Activation » : Unable to use it

WinReducer 8.1 – v1.00 (RC2) *(2014.01.19)*

==*This is a major update ! So, please consider it as an important update by rebuilding your WinReducer folder from scratch !*==

* ***NEW***

. "Drivers - Hyper-V - Dynamic Memory"

. "Drivers - Hyper-V - Fibre Channel HBA"

. "Drivers - Hyper-V - Generation Counter"

. "Drivers - Hyper-V – Input"

. "Drivers - Hyper-V – Guest"

. "Drivers - Hyper-V - PCI Bus"

. "Drivers - Hyper-V - Storage"

. "Drivers - Hyper-V – VMBus"

. "Drviers - Storage - Smart Array SAS and SATA Controller"

. "Drivers - USB Audio"

. "Services" : Black Viper Configuration is available for all WinReducer Services

. "Tweaks - Explorer - Automatically Expand to Current Folder"

. "Tweaks - Explorer - Remove Shortcut Suffix"

. "Tweaks - Explorer - Show Drive Letters Before Drive Names"

. "Tweaks - Mouse - Set Pointer to Default Button"

. "Tweaks - System - Disable Automatic Defragmentation"

. "Tweaks - System - Disable Ready Boot"

. "Unattended – Activate Auto Activation"

* ***UPDATED***

. English language file to v1.00 RC2

. Changed minimum screen size resolution to 1024*768

. "Accessories – System Restore" : Improve cleanup

. "Control Panels - Sync Center Folder (Files)" : Improve cleanup

. "Drivers - Floppy Disk" : Improve cleanup

. "Drivers - Hyper-V - Graphic Card" : Improve cleanup

. "Drivers - Network - Wireless - Atheros" : Improve cleanup

. "Drivers - Storage - Intel" : Improve cleanup

. "Drivers - Storage - VIA StorX RAID Controller" : Improve cleanup

. "Drivers - Support - Bluetooth" : Improve cleanup

. "Features – Windows Defender" : Improve cleanup

. "Features – Work Folders" : Improve cleanup

. "Services - Printer Support Services" : Improve cleanup

. "Services – Superfetch Service" : Improve cleanup

. "Services – Windows Time Service" : Improve cleanup

. "Services – Windows Error Reporting Service" : Improve cleanup

. "Services – Windows Update Service" : Improve cleanup

. "Tweaks - Explorer - Hidden Files and Folders (Show)" : Name Changed (Take to your wccf file)

. "Tweaks - Explorer - Hidden System Files (Hide)" : Name Changed (Take to your wccf file)

. "WinReducer Tools – Updates" : Improve categories name differences for Windows Updates (to slipstream automatically) and Executable files (to launch manually)

* ***FIXED***

. "Appearance – Cursors" : Solved minor GUI issues

. "Appearance – File Replacer" : Didn't work properly

. "Multimedia – Photo Viewer" : "Open with" menu cleanup

. "Multimedia – Photo Viewer" : Solved opening picture bug in case you removed "Services – Printer Support Services"

. "Optimizations - Windows - WinSXS Folder Compression" : Fix text information while executing tasks

. "Tweaks - Explorer - Remove Shortcut Arrow" : Didn't work properly. I totally changed how it works. So a blank file is used to replace the arrow (in "HOME\SOFTWARE"). In fact, you could easily customize the shortcut arrow by replacing it with the one you want. Read the Help Tips for more informations

. Fix various minor bugs

. Fix WinReducer GUI bugs

WinReducer 8.1 – v1.00 (RC1) *(2014.01.12)*

* *UPDATED*

. English language file to v1.00 RC1

* *FIXED*

. "Options – WinReducer Updates" : Didn't work properly for both Lifetime VIP and Normal User

. "Tools – Presets Editor" : Icon didn't disable while using other Tools

. "Control Panels" : Solved minor issues

WinReducer 8.1 – v0.99.7 *(2014.01.09)*

* *NEW*

. NEW "Tools" : "Preset Editor" helps you easily create your wccf file without mounting your Windows 8.x ISO

. "Appareance – Theme Support – File Replacer – Imageres.dll"

. "Tweaks - Context Menu - Add Take Ownership (with Pause)"

. "Unattended – Administrator Account"

. "Unattended – Administrator Password"

. "Unattended – User Password"

. "Unattended – Activate Administrator Autologon"

. "Unattended – Activate User Autologon"

. "Unattended - Turn Off Password Expiration"

. Maximize WinReducer Window, when configuring your components, is available

. "Features" : Option to select all Features to remove (at the same time) is available

. "Services" : Option to select all Services to remove (at the same time) is available (Black Viper's Configuration will come in the next build)

* ***UPDATED***

. **KNOWN BUGS - IMPORTANT 2** : Please, take some time to read it !

. English language file to v0.99.7

. "Component Remover Tab" : Navigating through all components using keyboard arrow keys will display all available "Help tips" (not only with your mouse)

. Many GUI Improvements

* ***FIXED***

. "TOOLS" icons : Added missing translation strings

. "Unattended" : "Other User" bug should be solved

WinReducer 8.1 – v0.99.6 *(2014.01.05)*

* ***NEW***

. "Services - Printer Support Services"

* ***UPDATED***

. English language file to v0.99.6

. Improve Components removing order to add better Windows cleanup and functionalities support

. "Accessories - Action Center" : Move to "Remove - Control Panels - Action Center (Files)"

. "Drivers - Support - Ram Disk" : Change name

. "Services - Diagnostic Policy Services" : Improve services configuration

. "Services - HomeGroup Listener and Provider Services" : Improve services configuration

. "Services - HyperV Services" : Improve services configuration

. "Services - Peer Name Resolution Protocol Services" : Improve services configuration

. "Services - Remote Access Manager Services" : Improve services configuration

. "Services - Remote Desktop Services" : Improve services configuration

. "Services - Smart Card Services" : Improve services configuration

* ***FIXED***

. "Open a Folder" and "Open and Extract an ISO" : didn't work properly under certains circumstances (like using an Upgrade ISO, ...)

. "Appreance – Modern UI Color (Login)" : Remove uneeded color numbers

- . "Tweaks - Explorer - Remove Shortcut Arrow"

- . "Tweaks - Explorer - Show Hidden Files and Folders" : Didn't work properly

- . "Tweaks - Explorer - Show Hidden System Files" : Didn't work properly

- . WinReducer GUI Themes support : Didn't work properly

WinReducer 8.1 – v0.99 (2013.12.01)

* ***NEW***

    . WinReducer 8.1 zip package : Include default english language and default GUI Theme in their respective folders (still no external software provided)

    . "Accessories – ModernUI - Lockscreen Camera"

    . "Accessories – ModernUI - Media Viewer"

    . "Accessories – ModernUI – Slide to Shutdown"

    . "Multimedia – Windows Media Center"

    . "Network - Internet Explorer (Developer Tools)"

    . "Tweaks - Desktop - Display Windows Build Number"

    . "Tweaks - Explorer - Enable Preview Pane"

    . "Tweaks - Explorer - Remove Shortcut Arrow"

    . "Tweaks - Explorer - Show Hidden Files and Folders"

    . "Tweaks – Explorer - Show Hidden System Files"

    . "Tweaks – Modern UI - Enable Apps to Work with UAC Disable"

    . "Tweaks - Recycle Bin - Disable Confirmation Dialog"

    . "Tweaks - System - Disable Windows Resource Protection"

    . "Tweaks - System - Improve Shutdown Speed"

    . "Tweaks - System – Improve Windows Shell Response"

    . "Tweaks - System - Disable NTFS Short Filenames Creation"

* ***UPDATED***

    . English language file to v0.99

    . "Accessories – Sound Recorder" : Improve Remove cleanup

    . "Features – Windows PowerShell" : Improve Remove cleanup

    . "Remove - Tweaks" : Name changed to "Tweaks"

    . "Remove - Optimizations" : Name changed to " Optimizations"

- "System – Drivers" : Improve detection of your Windows Edition. So if you choose to open a folder and hit directly OK button, the good folder path is displayed according to your Windows Edition (x86 or x64)

- "System – Net Framework 3.5" : Improve detection of your Windows Edition. So if you choose to open a folder and hit directly OK button, the good folder path is displayed according to your Windows Edition (x86 or x64)

- "System – Net Framework 3.5" : Improve the copy of Windows ISO "sources\sxs" folder to the WinReducer "Integrate\Upates\Framework35" by creating dedicated sub-folders according to your Windows Edition (x86 or x64)

- "System – Updates" : Improve detection of your Windows Edition. So if you choose to open a folder and hit directly OK button, the good folder path is displayed according to your Windows Edition (x86 or x64)

- Minor Various Improvements

* *FIXED*

- "Tweaks – Logon – Disable Shutdown Power Menu Icon" : Didn't work properly

- "System – User Folders" : Didn't work properly

WinReducer 8.1 – v0.98 (2013.11.28)

* *NEW*

- "Accessories - Windows Sidebar"

- "System – Integrate" : For Drivers, Net Framework 3.5 and Windows Updates

- "System – User Folders" : Change the path of all your personal folders

- "System – System Folders" : Change the path of all your system folders

- "System – WinReducer Post Installation" : Copy your prepared OEM folder

- "System - Integrate - Net Framework 3.5" : During mounting process, the Windows 8.1 ISO "sources\sxs" folder will be automatically copied to the WinReducer "WORK\INTEGRATE\UPDATES\SXS" folder. So if you want to integrate it in your ISO, just point it to the WinReducer folder "WORK\INTEGRATE\UPDATES\SXS". That's all !

- Add an incompatibilty information message if a Windows 8.1 Upgrade DVD is detected (if iSO contains an "install.esd" file instead of an "install.wim" file)

* *UPDATED*

- **"Known Bugs"** : Add troubles with "Accessories – Windows Mail", "Manage New User"

- English language file to v0.98

- Improve ISO Detection Engine : Improve Windows Edition names

- Improve Mount Engine

- Improve Unmount Engine
